Professional Summary

Senior AI Transformation & Operations Engineer with 6+ years of experience driving enterprise AI adoption, business intelligence, and automation initiatives across cross-functional organizations. Delivered enterprise RAG, AI copilot, forecasting, and workflow automation solutions that **accelerated roadmap delivery by ~20%, reduced manual effort by 25%+, lowered forecast error by 25%, shortened reporting turnaround by 40%, and generated ~\$50K in annualized cost savings.**

Core Competencies

AI & Automation: Generative AI, RAG Architecture, LLM Integration, Azure OpenAI, Microsoft Copilot Studio, AI Agent Development, Power Automate, Workflow Automation

Business Intelligence & Analytics: Power BI (DAX, Data Modeling), Tableau, SQL, Python, Machine Learning (TensorFlow, Scikit-learn), Forecasting & Predictive Modeling

Enterprise Systems: Salesforce CRM, SAP, Azure AI Search, Excel (Advanced)

Strategy & Operations: AI Roadmapping, Vendor Management, Program Management, Financial Modeling, Sales Operations, Cross-Functional Leadership, Stakeholder Communication

Work Experience

Senior AI Transformation & Operations Engineer

February 2025 – Present

Honda Motors North America

Hybrid

- **Architected and deployed an enterprise RAG system using Azure OpenAI and Azure AI Search**, enabling employees to query internal documentation and automate knowledge workflows; built end-to-end pipelines covering ingestion, chunking, embeddings, and vector search.
- **Delivered AI copilots via Microsoft Copilot Studio**, integrating conversational interfaces directly into enterprise workflows and reducing reliance on manual lookup processes.
- **Led Sales Operations & AI strategy initiatives end-to-end**, accelerating roadmap delivery by ~20% through structured program management and stakeholder alignment.
- **Built AI agents and automation workflows using Copilot Studio, Azure OpenAI, and Power Automate**, reducing manual effort by 25%+ across targeted business processes.
- Developed Power BI dashboards and DAX data models that improved KPI visibility and forecasting accuracy across IT, Sales, Finance, and Operations teams, translating business requirements into scalable AI and analytics solutions.
- Performed financial modeling & cost-benefit analysis to support AI investment prioritization & annual budgeting decisions.

Technical Product Manager

May 2020 – August 2024

American Medical Solutions

Remote

- **Managed and mentored a team of three analysts**, owning Sales Operations reporting, process automation, and analytics across a fully remote organization while serving as the primary liaison between business stakeholders and technical teams.
- **Developed machine learning models using TensorFlow and Scikit-learn for demand forecasting**, reducing forecast error by 25% and generating ~\$50K in annualized cost savings.
- **Built Power BI dashboards and automated reporting pipelines**, reducing reporting turnaround time by 40% and enabling faster executive decision-making.
- **Centralized Salesforce CRM and SAP data into unified SQL systems**, eliminating reporting silos and improving cross-functional decision-making speed by 40%.
- **Automated high-volume manual workflows**, reducing data-entry effort by 40% and freeing analyst capacity for higher-value analytical work.

Education

B.S. Management Information Systems

Graduated 2019

Rochester Institute of Technology

Cum Laude

Projects

Vehicle Damage Inspection System (Github)

YOLOv8, FastAPI, React

- Built a **YOLOv8 segmentation system** to detect dents, scratches, cracks, and other visible vehicle damage.

Automotive Safety Intelligence Copilot (Github)

React, NHTSA APIs, RAG

- Built an **automotive safety intelligence tool** that retrieves and organizes live NHTSA complaints and recalls.
- Ranked emerging safety signals using complaint volume, recency, and crash, injury, and fire indicators. [Live Demo](#)
